

## **Our Business** <sup>[1]</sup>

Novartis focuses its business on two divisions: pharmaceuticals and generics. These three divisions are supported by our research organization, the Novartis Institutes for BioMedical Research (NIBR), <sup>[2]</sup> and a centralized services group, Novartis Business Services, to facilitate collaboration across our divisions, and drive efficiency and productivity gains.

We aim to develop innovative products in growing areas of healthcare. At the same time, we are expanding our presence in the emerging markets of Asia, Africa and Latin America, where there is fast-growing demand for access to high-quality medicines and healthcare.
